

Service Interfaces

Mark Elkington

13 - 14 December 1993

Service Interfaces

Present Capabilities Of Systems As A Collection Of Services

➡ ***Support A Service Oriented Architecture***

Hide Architecture Details, Network Topology From User

➡ ***Support Change And Evolution***

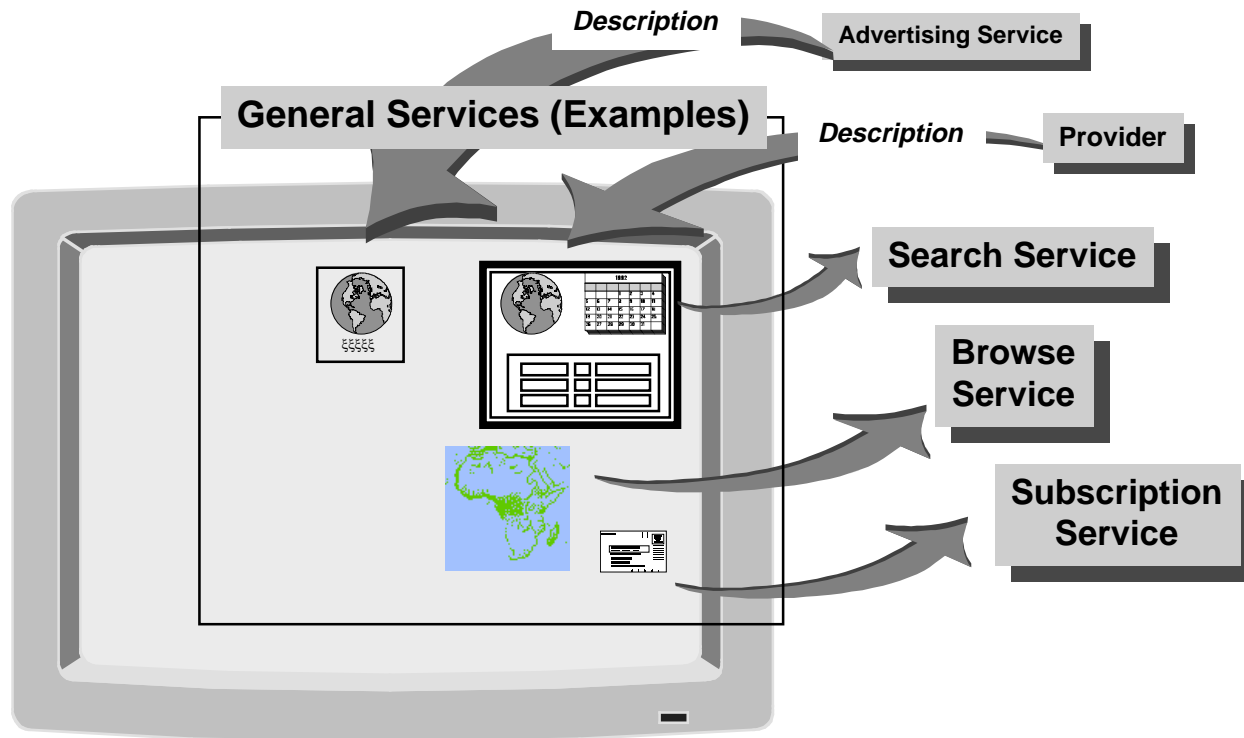

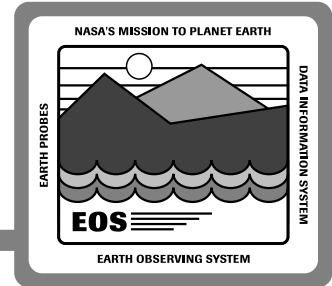

➡ ***Support True Distribution***

Services Interfaces Use “Dynamic Binding”

➡ ***Remove Static Dependence On Particular View Of Data***

➡ ***Support Extension To New Types of Services, New Providers***

General Service Interfaces

- Service Descriptions Configure Individual Interfaces
- Descriptions Come From Provider Or Advertisement

Interface Configuration
